SUMMARY

Full-Stack Developer with strong Python and Flask experience, specializing in automation, internal tools, and data-driven systems. Proven ability to design, debug, and deploy real-world applications across backend, frontend, databases, and containerized environments. Transitioned from a non-traditional background with extensive production problem-solving experience.

TECHNICAL SKILLS

Python, Flask, Django (basic), React (basic) JavaScript, HTML, CSS, SQL, SQLite, Pandas, Git/GitHub, Docker (basic), Celery (basic), REST APIs, Jinja2, MS Excel (Advanced), MS Access

EXPERIENCE

Designation: Lower Division Clerk

Python Automation & Full-Stack Developer (Internal Systems)

Islamabad Police — Dec 2009 to Present

- Designed and developed payroll and pension management systems using Python, Excel, and Access.
- Built Flask-based internal web applications for record and expense management.
- Automated repetitive financial workflows, reducing processing time by up to 65%.
- Debugged multi-layer issues across backend logic, databases, filesystem paths, and containerized services.
- Collaborated with finance and HR teams to gather requirements and deliver technical solutions.

PROJECTS

Pension Management System (Ms Access) - Deployed

- Built an MS-Access-based system automating pension eligibility, calculation, case processing and audit reporting for large employee datasets as per Federal Govt requirements.
- Implemented validation logic and calculation formulas, achieving **99.8% data accuracy** and **zero processing errors**.
- Reduced pension processing time by **90%** through workflow automation and structured reporting.
- Still in use by the department after my transfer to other making the life of the workers and pensioners easier.

Record Management Web App (Flask + SQLite)- CS50 Project.

- Built a full-stack Flask application with authentication, CRUD operations, and form validation for managing organizational records.
- Designed SQLite database schema and backend logic to ensure secure, accurate, and maintainable data handling.
- Reduced manual record tracking effort by **~45%** through centralized digital workflows.
- GitHub: https://github.com/rafi-2024/record_management_app

Billing & Accounting System (Django + React) (Federal Govt).

- Built a full-stack billing and accounting platform using Django REST, React, and PostgreSQL.
- Implemented secure role-based access control and REST APIs for financial transactions.
- Deployed and validated the system with automated tests, ensuring production readiness.
- Automating Billing creation reducing manual work by 90 %.
- GitHub: <https://github.com/rafi-2024/CBC-New>

Payroll PDF Parser (Django + React + CSV Pipeline)

- Developed a full-stack payroll PDF parsing and management system using Django REST Framework and React, converting PDF payroll data to CSV for fast, reliable bulk import into PostgreSQL.
- Implemented asynchronous processing with Celery and Redis, enabling background extraction of multiple PDF files concurrently, reducing manual processing time by ~70%.
- Built a real-time dashboard with search, filtering, and duplicate detection (SHA256 hashes) to ensure data integrity and avoid reprocessing.
- Ensured secure operations with session-based authentication, CSRF protection, Dockerized non-root containers, and proper mounting of temp/data directories.
- Automated deployment and migrations via container entrypoints, improving system reliability and maintainability.
- GitHub: <https://github.com/rafi-2024/payroll-New>

Professional Evaluation

- Independently evaluated for real-world full-stack debugging and problem solving.
- Rated 4.5/5 for persistence, logical thinking, and technical growth.

EDUCATION

Bachelor of Arts — University of Malakand

CERTIFICATIONS

- CS50 2024 (Harvard / edX),
- Python for Everybody (Coursera),
- Excel Data Analysis (Udemy)
- Introduction to Data Science (K-Streams)
- Laravel (in progress Web Educators)
- Power BI (Mind lusters)

LANGUAGES

English, Urdu, Punjabi, Pashto
